- Stereo Audio
(with Hyper Surround Sound)
- Multi-Function Timer

The Clear Choice for Affordable, High Quality Viewing Enhanced Picture Depth with Hyper Surround Sound!

Introducing a large-screen color Monitor/receiver that provides an inexpensive solution for your NTSC viewing needs. The TM-2701SU uses JVC's exclusive Black Level Expansion technology, which creates rich blacks and deeper, more vivid colors. With it's winning combination of big-screen presence and powerful features, this 27-inch monitor is ideal for applications ranging from education to exhibitions. The TM-2701SU sports a Dark Tinted Picture Tube, which produces much greater contrast between darks and lights over standard CRTs. This increases the depth of the blacks and dark colors on the screen. A Closed Caption Decoder with text mode opens up a variety of possibilities in applications including CATV, teletext, education, and exhibitions. And, with JVC's Hyper Scan High Speed menu-driven remote control unit, you are the master of JVC's latest high-performance color monitor and receiver.

- Superb picture quality with 550 lines of resolution
- 27-Inch Diagonal, full-square, Dark Tinted Picture CRT producing greater contrast between darks and lights
- Black Level Expansion Technology for more vivid colors
- With Hyper Surround Sound for a full viewing experience
- Built-in Closed Caption Decoder with Full Text mode
- Multi-Function timer with sleep mode
- 2 Line Digital Comb Filter for a sharper overall picture and smoother graphics
- Professional, Easy to Use I/O Connectors
- BNC Composite Input, S-Video Input, and RF Input
- 3 AV Inputs (1 Front, 2 Rear), Variable Audio Output
- English, French, and Spanish Menus
